C. HOME ENVIRONMENT FOR THE PUPPY

Where will your Mastiff spend its time? Outside, inside the home, a run, or a crate, etc? Please indicate approximate length of time for multiple locations.

NOTE: I recommend crate training the puppy full time until they are 4 months old to separate them from other animals and help stimulate self assuredness in a crated situation such as being transported, being left alone, being crated at a show or the veterinary office. They should eat and sleep in their crate. They can come out to play, go potty and then back in the crate with toys and chew toys for the remainder of the time.
